FABRIC REVERSING MACHINE

FOR TURNING FABRIC INSIDE OUT

SIDE VIEW

ANGLED VIEW

MACHINE DESCRIPTION

Two Star Textile Engineering manufactures high quality Fabric Reversing Machine, specially designed to turn fabric inside out. This machine is widely used in dyeing, washing and finishing processes to reverse tubular or open width fabric, ensuring uniform processing, better color penetration and high quality finishing. The machine is made of heavy duty mild steel with stainless steel reversing tube and is designed for efficient, reliable and continuous operation. Capacity and design can be customized as per customer requirement.

TECHNICAL SPECIFICATIONS

Machine Name	Fabric Reversing Machine
Fabric Width	As per requirement (e.g. 600 mm – 3600 mm)
Production Speed	As per requirement (variable)
Reversing Tube	Stainless Steel SS 304
Machine Frame	Mild Steel (MS) with powder coating
Drive System	Gear Motor with enclosed drive
Control Panel	With control switches (optional VFD)
Power Supply	As per requirement (e.g. 3 Phase)
Inlet / Outlet	Fabric entry and exit rollers with guide system
Application	Reversing tubular or open width fabric (For dyeing, washing and finishing)
Customization	Available as per customer requirement

KEY FEATURES

- Turns fabric inside out smoothly
- Suitable for knitted, woven, fleece and denim fabrics
- Stainless steel reversing tube (SS 304)
- Heavy duty and durable construction
- Continuous and uniform operation
- Easy operation with control panel
- Low maintenance and long service life
- Custom design and size as per requirement

OPTIONAL FEATURES

- Variable speed drive (VFD)
- Stainless steel contact parts (SS 316 optional)
- Automatic fabric tension control
- Larger fabric width options
- Inlet & outlet roller table
- Custom design as per fabric type

APPLICATIONS

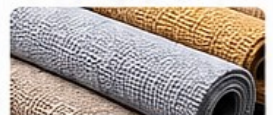

FLEECE FABRIC

DENIM FABRIC

KNITTED FABRIC

WOVEN FABRIC

TOWEL FABRIC
