

Socks dyeing machine (3 kg – 400 kg)

FEATURES

It is suitable to dye all kinds of knitwear and sweater. The dyeing machine is made of durable & anti-corrosion stainless steel with high quality. Speed can be adjusted briefly and protect clothes from damage during operation. Two heating methods are installed under the bottom of main body: direct & indirect, and heating efficiency is good. Dyeing machine takes less room and is operated easily.

For optional:

- Touch Screen PLC
- Pneumatic Drain
- Air Break System
- Indirect Heating(automatic constant temperature)
- Ration Inlet Water(should combine with touch screen PLC)
- TECO Invertor
- Mixing tank and dosing tank (50L /100L)
