

TUMBLER DRYER MACHINE

FEATURES :

- 1) The forward and reverse rotary action will prevent entanglement of garments.
- 2) Our machine is the best drying equipment with high working efficiency which at lowest voice and covers small space
- 3) The inner basket is made of stainless Steel which is anti –corrosion , sturdy , durable, for protecting the cloths from damage during the operation
- 4) more profit effect, it shorten more time and dryer more garments.
- 5) Applicable to washing & bleaching industry , textile industry, chemical industry, oil industry and so on .

For Optional

- 1) Heating Source
 - Heat Exchanger
 - MS Heat Exchanger With Aluminum Fins
 - SS Heat Exchanger
 - Copper Heat Exchanger
- 2) Touch screen PLC System
- 3) All Stainless Steel in wet surface

TUMBLER DRYER MACHINE SPECIFICATION

Capacity Will be As Per Your Requirement

- **Drum Size 5'x5'**
- Front Plate with 2mm SS
- Drum sheets 1.5mm perforated SS 304L
- Back and front Blind SS 1.5 mm SS 304L
- Back blind supported with MS sheet 5 mm thickness
- MS Sheet 16gauge thickness for both sides
- MS Plate 3mm back & channel MS 20mm plate for shaft & bearing fitting
- MS Sheet 10mm for pully & bearing fitting
- Inside & base MS Sheet 18 Gauge for Double Jackets
- Reverse forward panel with timer
- Panel with LG accessories
- Drum Drive 3HP 900RPM motor
- Blower with 3HP 1400RPM (with double blower)
- Cabin of heat exchanger with 2mm MS sheets
- Pully with bush system
- Control with auto control switch system
- Door design two star textile engineering
- Heat Exchanger with 16mm tube and aluminum finiz 0.5mm x 10mm
- Heat exchanger with 3 piece design as per two star
- MS sheet 12 mm and MS pipe 6mm thickness for steam header
- Paint
